**Phase I** 

### **ONCOLOGY EXPERTISE**

As a full-service CRO specializing in oncology clinical research development, MedSource has had the opportunity to participate in over 750 clinical trials globally and over 300 of those trials have been in oncology. With oncology experience ranging from solid tumors and lymphomas to hematologic malignancies to palliative and supportive care, our team has the breadth and depth needed to execute across the entire therapeutic area. From our founding as an oncology focused CRO to holding one of the industry's most seasoned oncology clinical teams today, we are trusted to run the most challenging oncology trials.

By focusing on our core service offerings, we exceed expectations with superior results.

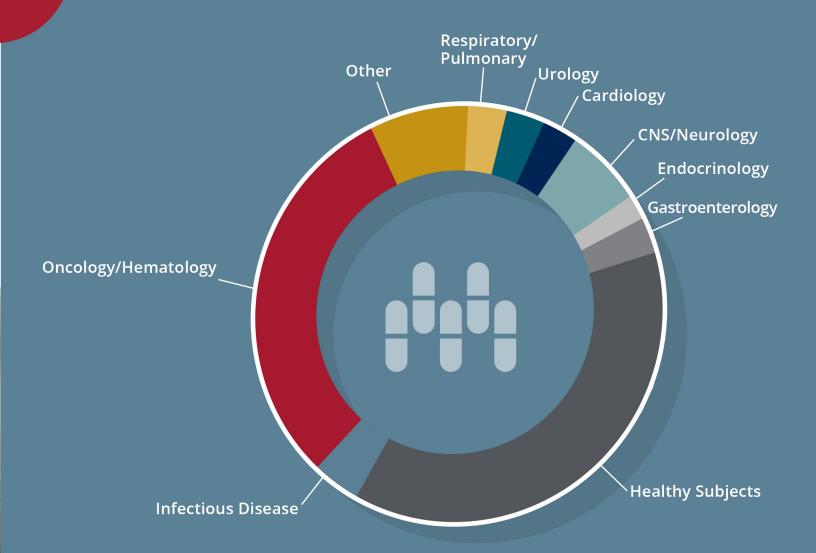

### **CENTRAL NERVOUS SYSTEM EXPERTISE**

MedSource has gained specialized experience in the area of central nervous system (CNS), neurology and psychiatry clinical research development, by participating in more than 44 CNS clinical trials covering a broad range of mood, movement, and pain-related disorders. Our diverse clinical trial experience, coupled with our knowledgeable and experienced team, allow us to confidently handle the most complex trials and patient populations with the attention and focus needed to navigate the CNS clinical trial landscape.

#### RARE DISEASE EXPERTISE

With over twenty years of experience in the CRO industry focusing on complex clinical trials, MedSource has particular experience with rare disease clinical research development. Our expertise has allowed us the opportunity to execute complex clinical trials across the most challenging disease states affecting both rare and orphan patient populations. Performing on over 200 clinical trials in rare or orphan diseases, covering a broad range of indications and therapeutic areas, we have built the trust our clients need to manage their rare disease clinical trials.

MedSource is an award-winning clinical research organization (CRO) that provides trusted support for complex clinical trials including oncology, central nervous system (CNS), and rare diseases.

As leaders in the industry, we know that strong relationships lead to strong results. While our services have expanded through the years, we've always kept our clients, employees and trial subjects a priority. With their needs in mind, we match a flexible process with transparency at every step along the way. Our goal is for our clients to return to MedSource whenever they need high-quality clinical trial support, because they know we will always act with their best interests in mind. At MedSource, we take telationships as seriously as sciene.

## **FEATURED SERVICES**

We provide our clients with flexible clinical research services, project-specific experience and integrated senior management. Whether tackling a challenging therapeutic area or developing a sophisticated trial design, our experienced team uses strong relationships to deliver high-quality clinical trials. By focusing on our core service offerings, we exceed expectations with superior results.
